MPF Program: New Property Demographics Tool to Simplify AMI

We're excited to announce a new **Property Demographics** tool that will simplify your process when identifying the **Area Median Income (AMI)** for mortgage loans. This feature will be available beginning September 23 via [eMPF[®]](#) and can be accessed through two locations:

1. Under the Resources Tab, select Property Demographics

2. Included in the Quick Links menu

The new tool assists in identifying the 80% AMI threshold applicable to the property address provided. Enter the complete property address, and the tool will return the AMI information using the FHFA's 2024 Area Median Income File as well as other demographic data.

The screenshot shows a web application titled "Property Demographics". It features a search form with the following fields: "Property Address" (containing "433 West Van Buren"), "City" (containing "Chicago"), "Zip Code" (containing "60607"), and "State" (a dropdown menu showing "IL"). Below the form are "SEARCH" and "CLEAR" buttons. The results section, titled "Property Demographics", displays the address "433 West Van Buren, Chicago, IL, 60607, USA" and lists three income thresholds: "100 % Area Median Income: \$109,800.00", "80 % Area Median Income: \$87,840.00" (highlighted in red), and "50 % Area Median Income: \$54,900.00". A section titled "Other Demographics Data" provides additional information: "County: COOK", "FIPS Code: 17031841900", "Low Income Area: No", and "Minority Tracts: No".

Additionally, you can now indicate that a loan presented for funding is supported by the FHLBank Affordable Housing Program (AHP), using the enumerations available in the XML file. This means there is no longer a need to contact the MPF® Service Center when delivering MPF Traditional loans with AHP funds when the Loan-to-Value (LTV) is greater than 95%.
